Extension cable

PowerTOP Xtension

PowerTOP Xtension is the ideal solution for anyone who relies on maximum performance and reliability even under the most demanding conditions. Each PowerTOP Xtension consists of a robust connector and a powerful plug from the PowerTOP Xtra series, which are connected by a durable H07RN-F rubber hose cable. This combination not only guarantees excellent power supply but also maximum service life – even during intensive use in professional environments.

Available in protection classes IP54, IP67 and IP67 / IP69, the PowerTOP Xtension now offers the proven PowerTOP Xtra product features also as a flexible extension cable. This makes it optimally protected against dust, dirt, splashing water or high-pressure water jets and perfectly suited for use in industry, skilled trades or construction environments.

An additional highlight is the robust, reusable cable hook-and-loop strap with an integrated hanging eyelet, which is firmly attached to the extension cable. This allows the cable to be bundled effortlessly, safely rolled up and stored in a space-saving manner – for more order, efficiency and a professional appearance at the place of use.
